FIELD MODIFICATION APPROVAL FORM**LFM-OU3-08***Libby OU3 Phase I Sampling & Analysis Plan*

Requested by: Remedium/MWH _____ Date: 12/11/07 _____

Description of Deviation:

ADMINISTRATIVE RECORD

The surface water sample collected on 10/13/07 at Station ID TP will be re-sampled by Matt Young and John Garr of MWH on 12/12/07 at the same location. Benzene was detected above primary drinking water standards at 0.008 mg/L in the trip blank (Index ID P1-00274) associated with sample P1-00269. Even though the benzene detection in the trip blank affects only the results for VPH analysis, the sample will be collected for all non-asbestos analyses, as originally requested, and will be reanalyzed by the contract laboratory. A FD sample will also be taken. A trip blank will accompany the samples.
